UNIVERSITY

INSTITUTE FOR  
POPULATION RESEARCH

In collaboration with the WHO VA Reference Group.

# **Next Steps..**

## **Applying Skills using own data...**

- **VA Raw Data Examination and Cleaning**
  - E.g. What variables to look for?
- **Running the VA Algorithm(s)**
  - IntervA, InSiliCo, SmartVA
- **VA COD Examination**
  - Merging Algorithm input and output data
  - Examining the merged and COD versus symptoms e.g. unexpected COD
- **Plotting/Visualizing outcomes**

**Timelines for developing country specific protocols...**

# Next steps

## Institutionalizing VA data quality review work..

- How do we integrate VA data quality review?
- Is there existing structure to support the institutionalization?
- What follow up is needed?
- What about Inter-country collaboration?

# Next Steps...

## Community of Practice... (staying on Task)

- Need to define goals and objective
- Group leadership. Who takes lead?
- Knowledge sharing and communication platform.
